

Data description

The file card.dta contains data from the National Longitudinal Survey of Young Men (NLSYM). The data focuses on 1976 but uses some variables that date back to earlier years. The following variables are available (many are dummy variables):

1. nearc2 =1 if near 2 yr college, 1966
2. nearc4 =1 if near 4 yr college, 1966
3. educ years of schooling, 1976
4. age in years
5. fatheduc father's schooling
6. motheduc mother's schooling
7. weight NLS sampling weight, 1976
8. momdad14 =1 if live with mom, dad at 14
9. sinmom14 =1 if with single mom at 14
10. step14 =1 if with step parent at 14
11. reg661-9 regional dummy, 1966
12. south66 =1 if in south in 1966
13. black =1 if black
14. smsa =1 if in SMSA, 1976
15. south =1 if in south, 1976
16. smsa66 =1 if in SMSA, 1966
17. wage hourly wage in cents, 1976
18. enroll =1 if enrolled in school, 1976
19. kww knowledge world of work score
20. iq IQ score
21. married =1 if married, 1976
22. libcrd14 =1 if lib. card in home at 14
23. exper age - educ - 6
24. lwage $\log(\text{wage})$
25. expersq exper^2
